Sanitation: A human rights imperative

"Clean water and sanitation are not only about hygiene and disease, they're about dignity, too ... [E]veryone, and that means ALL the people in the world, has the right to a healthy life and a life with dignity. In other words everyone has the right to sanitation." Prince Willem Alexander of the Netherlands, Chair of the UN Secretary General Advisory Board on Water and Sanitation.

The centrality of sanitation to development

2.5 billion people lack access to basic sanitation. Tellingly, the Millennium Development Goal sanitation target, to have by 2015 the proportion of people living without access to sanitation, remains the most off-track of all the MDG targets. The impact of a lack of sanitation on health, education and economic growth is profound. Every day, at least 5,000 children under the age of five die due to diarrhoea, a disease directly related to poor sanitation. Lack of adequate sanitation in schools is a critical barrier to school attendance, particularly for girls. The resulting economic cost to individuals and to governments of ill-health and under-education is at least nine times greater than the cost of addressing this problem.

What is sanitation in human rights terms?

Sanitation is access to, and use of, excreta and wastewater facilities and services that ensure privacy and dignity, ensuring a clean and healthy living environment for all.

"Facilities and services" should include the collection, transport, treatment and disposal of human excreta, domestic wastewater and solid waste, and associated hygiene promotion.

Specifically, to meet human rights requirements, sanitation must be:

- **Safe:** Sanitation must effectively prevent human, animal and insect contact with excreta. Toilets (including latrines) must provide privacy and a safe and dignified environment for all. Water must be available for good personal hygiene, and facilities for safe wastewater disposal must be in place.
- **Physically accessible:** Toilets must be within, or in the immediate vicinity of, each household, educational institution or workplace and available for use at all times of the day or night, along with associated services such as removal of wastewater and sewerage or latrine excretion. Appropriate facilities for use.

Jobs featured: <http://tfx.tallyfox.com/company-c6k/global-water-jobs-igMmKog31wVuECp6mFln-Q/home>

The screenshot displays the 'COMPANY PROFILE' page for Oxymem on the TallyFox platform. The header includes the TallyFox logo, navigation links like 'Mission Ganga', and search options. The main content area is divided into several sections: 'Who we are' (mission statement and company description), 'Contact info' (address, phone, email, and map), 'Products and Services (8)' (a carousel of product images), 'Job offers (4)' (a list of job postings with details like 'Financial Research and Analytics Jobs'), 'Industry Expertise' (a list of expertise areas like 'GREEN TECHNOLOGY'), and 'Latest updates' (a list of recent posts or news items). The page is designed with a clean, professional layout, featuring a blue and white color scheme.

Member Profile

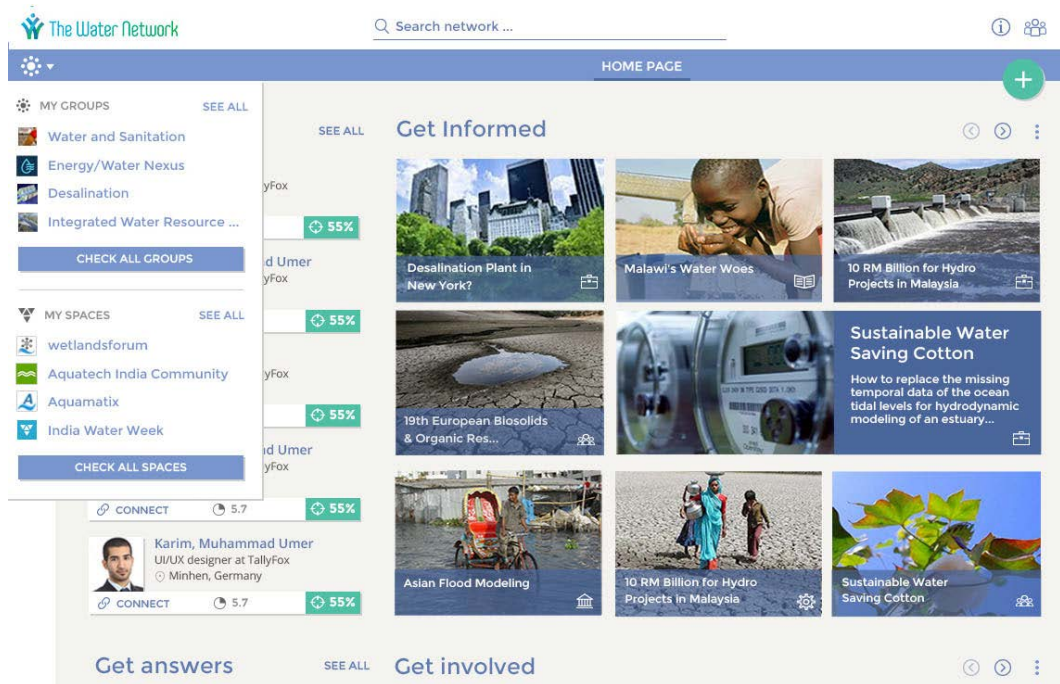

- My professional profile
- Ranking makes discovery of experts easy
- Industry expertise and recommendations to identify know-how
- Custom content featured on My Profile

<https://projects.invisionapp.com/d/main#/console/3031305/67180942/preview>

The screenshot displays a user profile for 'Lissa, Collins' on 'The Water Network' platform. The profile includes a header with the user's name, a green '15%' badge, and a circular 'RANKING' gauge showing '6.2' for 'INDUSTRY EXPERIENCE' and 'COMMUNITY TALLY'. Below the header, there are tabs for 'PROFILE', 'ACTIVITY', 'GALLERY', 'DOCUMENTS', and 'BLOG'. The main content area is divided into several sections: 'Network (256)' with a grid of user avatars, 'Member of' with a list of groups like 'Water Research' and 'FCC Aquella', 'Contact info' with location, phone, and email, 'Latest activity' with a list of recent posts, 'Industry Expertise' with a list of topics like 'Green technology' and 'Agriculture and Forestry', 'Summary' with a bio and a list of documents, 'Work Experience' with a list of roles like 'Executive Director' and 'Co owner', and 'Education' with a list of institutions like 'Univerzitet u Beogradu'.

Energy/Water Nexus

Business | Open group • Created 12 March 2015

About Energy/Water Nexus

Energy production depends on water. It is used in power generation, primarily for cooling thermal power plants; in the extraction, transport and of fuels; and, increasingly, in irrigation to grow biomass feedstock crops. Energy is also vital to providing freshwater, needed to power systems that distribute and treat it. Each resource faces rising demands and constraints many consequence of economic and population and climate change to one another. Energy sector, constraints on water can challenge the reliability of existing operations as well as the physical, economic and environmental viability ... [READ ALL](#)
